Subject: Yucca Mountain

Part of Records Package / Supplement / Correction

> Ms. Carol Hanlon  
> S&ER Products Manager  
> US DOE  
>  
> Ms. Hanlon,  
>  
> I am sending this e-mail to you to encourage you and your organization to  
> recommend the approval of the Yucca Mountain site to the President without  
> further delay.  
>  
> I have been employed in this industry for over 20 years and the commitment  
> to safety, compliance with regulations, and successful operation of our  
> power plants is second to none. As part of our successful track record,  
> we have had to design, build and safely install on-site dry storage  
> containers for our spent fuel rods, hoping that the DOE Yucca Mountain  
> project would be completed.  
>  
> The time is now. No more delays!! Our industry has had to spend millions  
> of dollars to design and install the aforementioned dry-storage systems on  
> site because of this 20 year project. I have reviewed the PSSE and the  
> NEI comments to the same dated 09/25/01 and believe that the Yucca site  
> design is technically sound with credible safety analyses, meeting the  
> requirements of the Nuclear Waste Policy Act and 10 CFR Part 963.  
>  
> Finally, the National Academy of Sciences recently affirmed that the  
> geologic disposal is the only scientific and technical solution to our  
> nation's high-level radioactive waste storage issue.  
> For all of these reasons, I urge your department to recommend the Yucca  
> site to the President.  
>

Don Haley
